

SANAKO Lab 100 Functionalities

THE AFFORDABLE AND HIGH PERFORMANCE LANGUAGE TEACHING SOLUTION

SANAKO Lab 100 is a versatile language learning center that requires only one computer - the teacher's. Students are equipped with durable, low cost and simple to operate user audio panels with high-quality digital audio that is ideal for language learning.

SANAKO Lab 100 provides students with a broad range of exercises for individual, paired or group study.

Easy-to-use Language Lab

With Sanako Lab 100, you will have a user-friendly and dynamic system. This innovative language lab provides a variety of instructional modes that guide you through the lesson. In Lab 100, you don't have to worry about making a wrong move, since only those controls that are necessary for a particular phase of a program are available at that time. Lab 100 offers effective and enjoyable tools for communication, instruction and student assessment.

SANAKO Lab 100 User Audio Panel

Activity-based Approach

The Sanako Lab 100 language learning center offers a wide variety of learning activities to choose from, such as Pairing, Listening Comprehension and Recorded Response. The teacher's graphical user interface offers total control of the student User Audio Panel regardless of the activity, and is available in multiple languages. Default settings for each activity match the task, but may be changed to select or deselect the recording function for both the master and student track(s).

Sessions

During each session, you can initiate different activities for the students to work on. The Lab 100 sessions are color-coded, and you can easily view relevant information to follow and guide your students' progress.

Many Ways to communicate in the Lab

With Sanako Lab 100, you can control the entire class and communicate with an individual, a pair, or a group of students, without disturbing the others. For instance, the Random Pairing option or the Phone Conversation activity can be used to pair two students together for conversation practise. All other students can be involved in a completely different activity.

Digital and Analog Program Sources

In the Sanako Lab 100 sessions, audio sources can include any digital media that you access through your computer or any shared network resource. Auxiliary sources, such as MP3, CD audio and audio/video cassette players, can also be connected through a Program Source Interface.

TESTS

Recorded Response

Student performance can be monitored and assessed by recording individual responses.

Regional Test: AP® Exam (in the United States)

Sanako Lab 100 allows you to administer state and national certified activities such as AP® oral exams. Lab 100 is specially designed to set up, test and collect student AP® responses.

AP is a registered trademark of the College Entrance Examination Board.

Quiz

With the Lab 100 Quiz function, you can easily add multiple-choice and true/false exercises to your teaching plan. A graphical display of test results in real-time is provided, and a complete test report can be printed.

SANAKO Lab 100 Software

Teachers remain at the heart of the learning experience with SANAKO Lab 100 monitoring and control tools.

Student Grading

With the Lab 100 grading function you can give students grades and additional notes. The grade results can be seen in a report view, which can be saved and printed out for later review. The grade report lists students as present or absent when the test was taken, as well as the students' performance in the exam. The appropriate grade scale is selected according to the test type in question.

SELF STUDY

You can allow students to operate their digital Lab 100 User Audio Panels to work with the program individually and at their own pace. You can assign audio files or an external program source for individual study. At the end of the session, the students' recordings can be collected and saved.

Library Mode

In Lab 100 Library Mode, you can send the same file to students, or a different file to each. Even if the students all have the same file, they can work independently with their own copy.

Audio-on-Demand

You can provide the students with a selection of "audio-on-demand" material that they can then access at their own pace.
